

Betty's Cool Breeze Summertime Drink

Uploaded on 16 Aug 2010

In this video, Betty demonstrates how to make a refreshing Cool Breeze Summertime Drink. In Kentucky the temperatures have been near 100 degrees lately, and my family has found this drink to be delicious and cooling!

Ingredients:

- 1 cup orange juice, chilled
- 1 cup pineapple juice, chilled
- 1 cup orange sherbet
- ½ cup club soda
- additional orange sherbet for topping the drink
- fresh mint sprig for garnish, optional

Combine 1 cup orange juice, 1 cup pineapple juice, and 1 cup orange sherbet in an electric blender. Cover and blend until smooth. Add ½ cup club soda to the mixture and stir until combined. Pour into tall glasses and top each glass with a scoop of orange sherbet. Garnish each glass with a sprig of fresh mint, if desired. Serve immediately. (You will need to provide a spoon for eating the still-frozen sherbet at the top.) Enjoy!!! Love, Betty ♥
