

Betty's New Year's Eve Lime Champagne Drink

Uploaded on 29 Dec 2011

In this video, Betty demonstrates how to make a New Year's Eve Lime Champagne Drink. This is very simple to make, and it can be made with champagne or with a substitute, if you prefer a nonalcoholic drink. It is green with red or green garnish; just perfect for the holidays!

Ingredients (makes about 4 drinks):

1 package unsweetened lime Kool-Aid (I used lemon-lime flavor in the demonstration, but lime is better.)

1 cup sugar (I used 1 cup Stevia. You may use any artificial sweetener that has the sweetness of 1 cup sugar.)

1/3 cup water

2 scoops lime sherbet per drink

champagne or substitute, as much as desired (I used club soda, but other choices include ginger ale, 7-Up, Sprite, and other light colored carbonated beverages.)

red or green stemmed maraschino cherries for garnish

In a small bowl or measuring cup, mix 1 package lime Kool-Aid with 1 cup sugar. Add 1/3 cup water and mix well. Place 2 scoops lime sherbet in a stemmed glass. Gently pour champagne (or substitute) into the glass to desired level. Spoon about a tablespoon of the Kool-Aid mixture over the top and garnish with stemmed red or green maraschino cherries. Serve immediately! This is yummy and also low in calories for a drink like this! Enjoy!!! Happy New Year, with love! --Betty & Rick ♥♥♥♥♥
