

Betty's Done-In-A-Snap Country Style Green Beans Recipe

Uploaded on 20 Aug 2009

In this video, Betty uses a tip from her sister to demonstrate how to make Country Style Green Beans, without the fuss and trouble of starting from fresh beans. Straight from a can, with a little special seasoning, these green beans taste as good as the pressure cooker green beans we did earlier this summer!

Ingredients:

(2) 15 oz. cans cut green beans, juice included

1 tablespoon cooking oil

1 packed Goya ham-flavored seasoning mix (This has the flavor equivalent to 1/4 pound smoked country ham.)

Empty 2 cans of cut green beans into a medium-sized saucepan, including liquid from cans. Add 1 tablespoon cooking oil and 1 package Goya ham-flavored seasoning. Stir until combined. Place a lid (that fits) on the saucepan, and cook until most of the liquid is absorbed. this will take about 2 or 3 hours. You may serve them immediately, or set them aside and heat them up when the rest of your meal is ready. Very carefree--and delicious!
